The goal of Fitzgibbon Hospital's Pink Out events is to increase cancer awareness among all age groups in Saline County. One way we increase awareness is to provide information about cancer prevention and the cancer screening, detection, and treatments available at Fitzgibbon Hospital. Cancer diagnosis and treatment are very serious matters and using a variety of public events to raise awareness has proven to be a successful tool in educating people about their options.

Fundraising proceeds from **Pink Out** activities go toward Community Cancer Center patients' needs.
